

Air Quality Programs Update

April 14, 2016

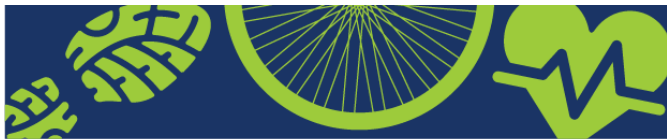

Mid-Ohio Regional
Planning Commission

MIKE MUNDEN | DISPATCH

Days of smog and sunscreen | Hot, humid weather with temperatures in the 90s makes for a smoggy view of downtown from Grandview Avenue and eastbound I-670. Yesterday's air-quality index rated a 114, in the lower portion of the "unhealthy" rating, according to the Ohio Environmental Protection Agency. The UV factor for ultraviolet rays was rated 7, or "very high."
