

Downtown Columbus

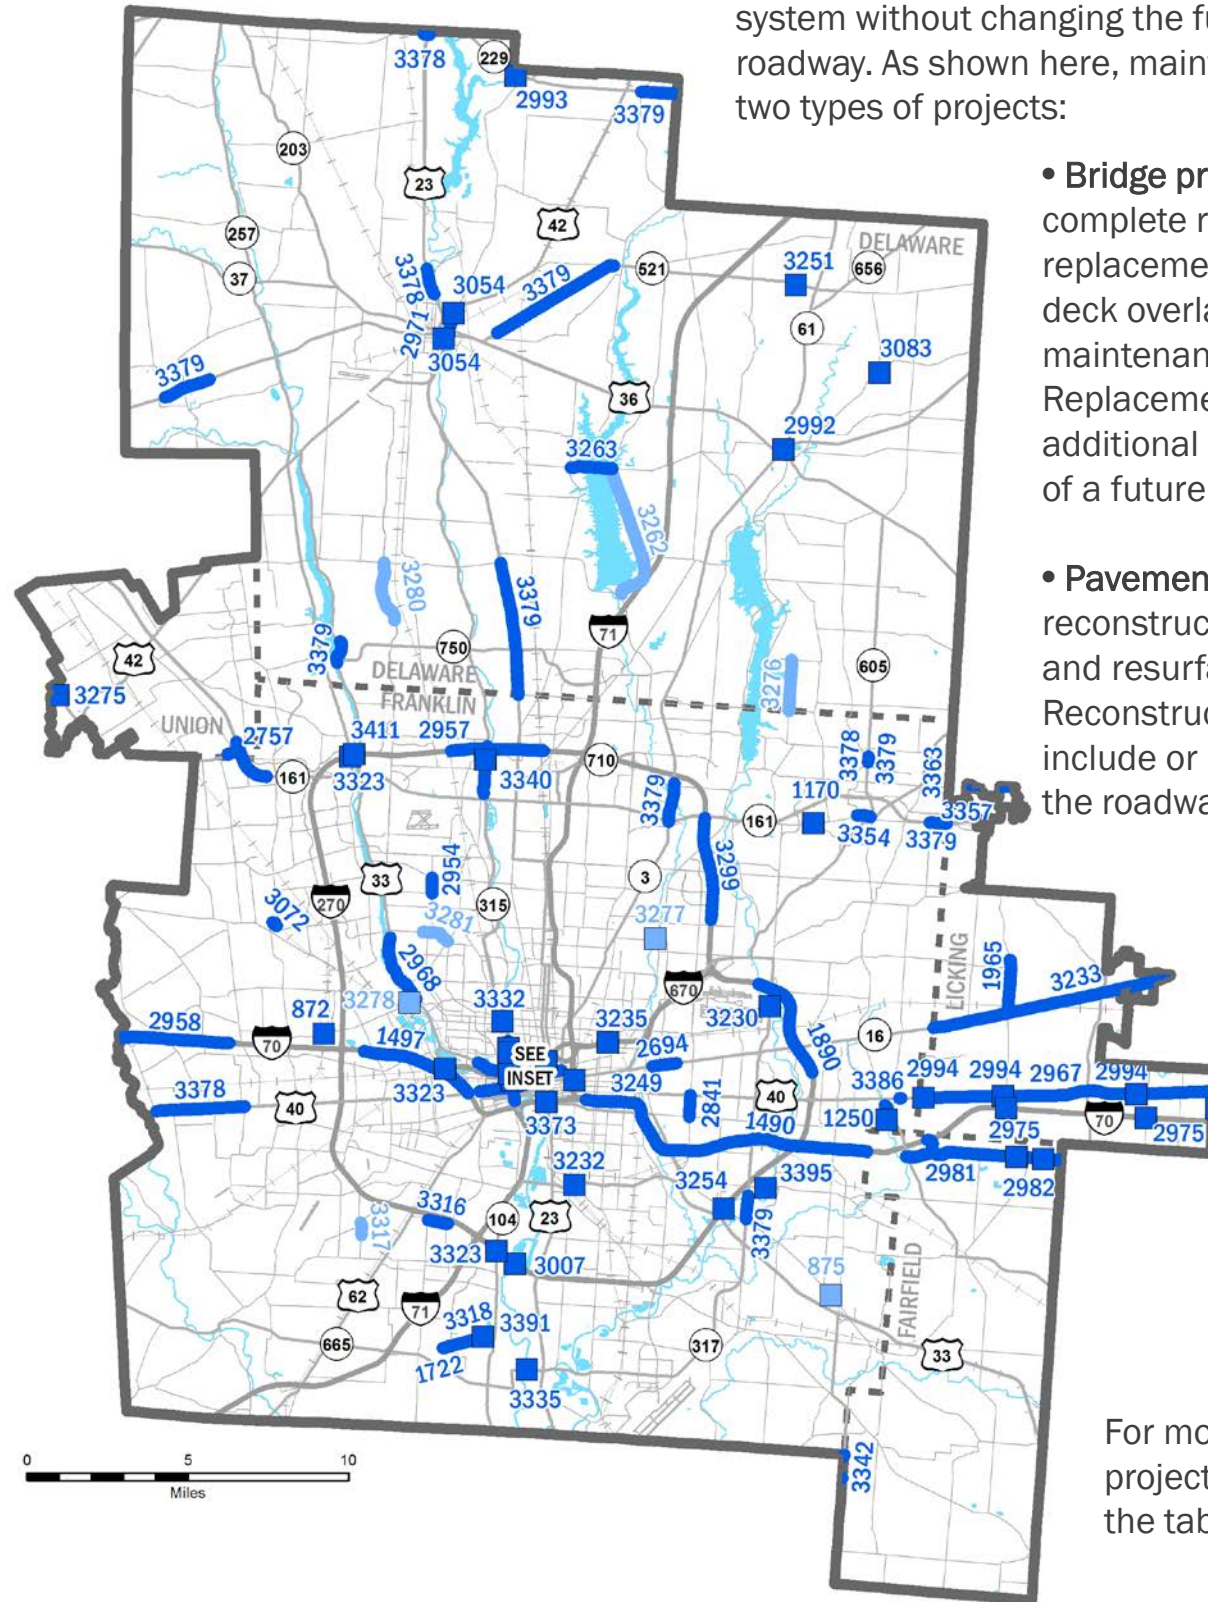

Maintenance Funding SFYs 2018-2021
Total: \$319 M

Maintenance projects support the transportation system without changing the functionality of the roadway. As shown here, maintenance comprises two types of projects:

- **Bridge projects**, including complete replacement, deck replacement, rehabilitation, deck overlay, repair, and other maintenance activities. Replacements could include additional capacity in advance of a future roadway widening.
- **Pavement projects**, including reconstruction, rehabilitation and resurfacing. Reconstruction projects may include or exclude bridges on the roadway segment.

The map and project listing excludes minor maintenance activities, such as preventive measures, mowing, and maintenance of culverts, guardrails, signs, and pavement markings. However, the pie chart above includes all maintenance funding.

For more information about a project, find the ID number on the table inside.
