

The Honorable Anthony R. Foxx
Secretary of Transportation
U.S. Department of Transportation
1200 New Jersey Avenue S.E.
Washington, D.C. 20590

Re: Expression of Support for the Rickenbacker Inland Port FY 2017 FASTLANE Application

Dear Secretary Foxx,

We are pleased to provide this letter expressing our strong support for the Rickenbacker Inland Port Interstate Connector FASTLANE application, which includes adding a third through lane in each direction to the existing stretch of Alum Creek Drive along a 2.3 mile stretch between State Route 317 to the south and Groveport Road to the north.

The Columbus Regional Airport Authority (CRAA) has partnered with Norfolk Southern Railway, the Franklin County Engineer's Office, and the Mid-Ohio Regional Planning Commission (MORPC) to assess critical improvements needed in the Rickenbacker Inland Port area. This application represents a package that addresses the area's transportation network in a comprehensive, multimodal manner.

This critical improvement focuses on increasing capacity along Alum Creek Drive, the north-south connection between Rickenbacker and I-270. A component of USDOT's National Primary Freight Highway System (PHFS) and a state-designated and federally-accepted National Highway System (NHS) Intermodal Connector Route, Alum Creek Drive is a critical freight corridor for the region. The widening improvement will alleviate two sources of congestion: the increased traffic generated by the growing number of successful businesses and the increased regional truck traffic generated by increasing volumes at the Rickenbacker Intermodal Facility.

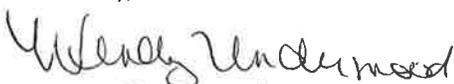

Congestion along Alum Creek Drive has reached the point where operations of local businesses are being adversely affected. Our company, Stella and Dot, LLC., has experienced the following:

1. Safety concerns due to cars pulling out from Toys r Us and Amazon: It is so dangerous with cars approaching at 55mph.
2. Traffic Lights: The amount of increased truck traffic and timing of the traffic lights. People are stopping after only a minute due to the time it takes the trucks to get up speed and through the traffic lights.
3. Exit ramp from 270 to Alum Creek: Safety risk with people having to stop on the road to wait for the ramp. At times, backed up for a mile.
4. Workforce Timeliness: We are realizing an marked increase in our tardiness due to the increase in traffic and accidents along Alum Creek Drive, Rohr Road, Hamilton Road and Opus Drive.

The transportation infrastructure improvements detailed in this application are increasingly critical to business retention and attraction in Central Ohio, as well as regional and statewide freight movements. We respectfully request that the U.S. Department of Transportation consider the importance of these improvements to the prosperity of one of our region's most important job-creating areas.

Thank you for your consideration.

Sincerely,

Wendy Underwood
Senior HR Manager
