

PROPOSED GOALS OF THE MTP

Through transportation:

Reduce per capita energy consumption and promote alternative fuel resources to increase affordability and resilience of regional energy supplies

Protect natural resources and mitigate infrastructure vulnerabilities to maintain a healthy ecosystem and community

Position Central Ohio to attract and retain economic opportunity to prosper as a region and compete globally

Create sustainable neighborhoods to improve residents' quality of life

Increase regional collaboration and employ innovative transportation solutions to maximize the return on public expenditures

Use public investments to benefit the health, safety, and welfare of people

COMMENTS RECEIVED

- Two comments received via email and facebook
- **Comment:** “...include the economic impact the construction phase of any project has on the area to be served. ... Projects need to be required to evaluate and estimate the impact the construction phases will have and offer mitigation alternatives.”
- **Comment:** “These all sound really great, but they are way too vague. ... They pretty much fail every criteria for good goal setting.
