

CENTRAL OHIO WATER RESOURCES PLANNING

REGIONAL

MORPC is providing planning services to Ohio EPA to develop an updated and comprehensive Water Quality Management Plan for the three-county area, including Morrow, Logan and Champaign counties.

COMPREHENSIVE

A regional approach promotes efficient and comprehensive programs for water treatment and for controlling water pollution from point and non-point sources. Identifying sewer service boundaries helps to avoid duplicative investments. Taking a regional view benefits our communities as we accommodate for growth while meeting the needs of existing and future generations.

COLLABORATIVE

MORPC will work with utility providers, waste management agencies, local governments, and other stakeholders to develop the best plan possible. MORPC will act as the responsible agency on behalf of the Ohio EPA to update and expand the existing Water Quality Management Plan, as well as maintain and update the plan. Where disagreements cannot be resolved, the responsibility of dispute resolution will be undertaken by Ohio EPA.

MORPC WILL...

- Review existing plans
- Inventory, map, and analyze existing conditions
- Evaluate projected needs through 2040 and identify best practices
- Develop a general plan and facilitate stakeholder engagement

ABOUT US

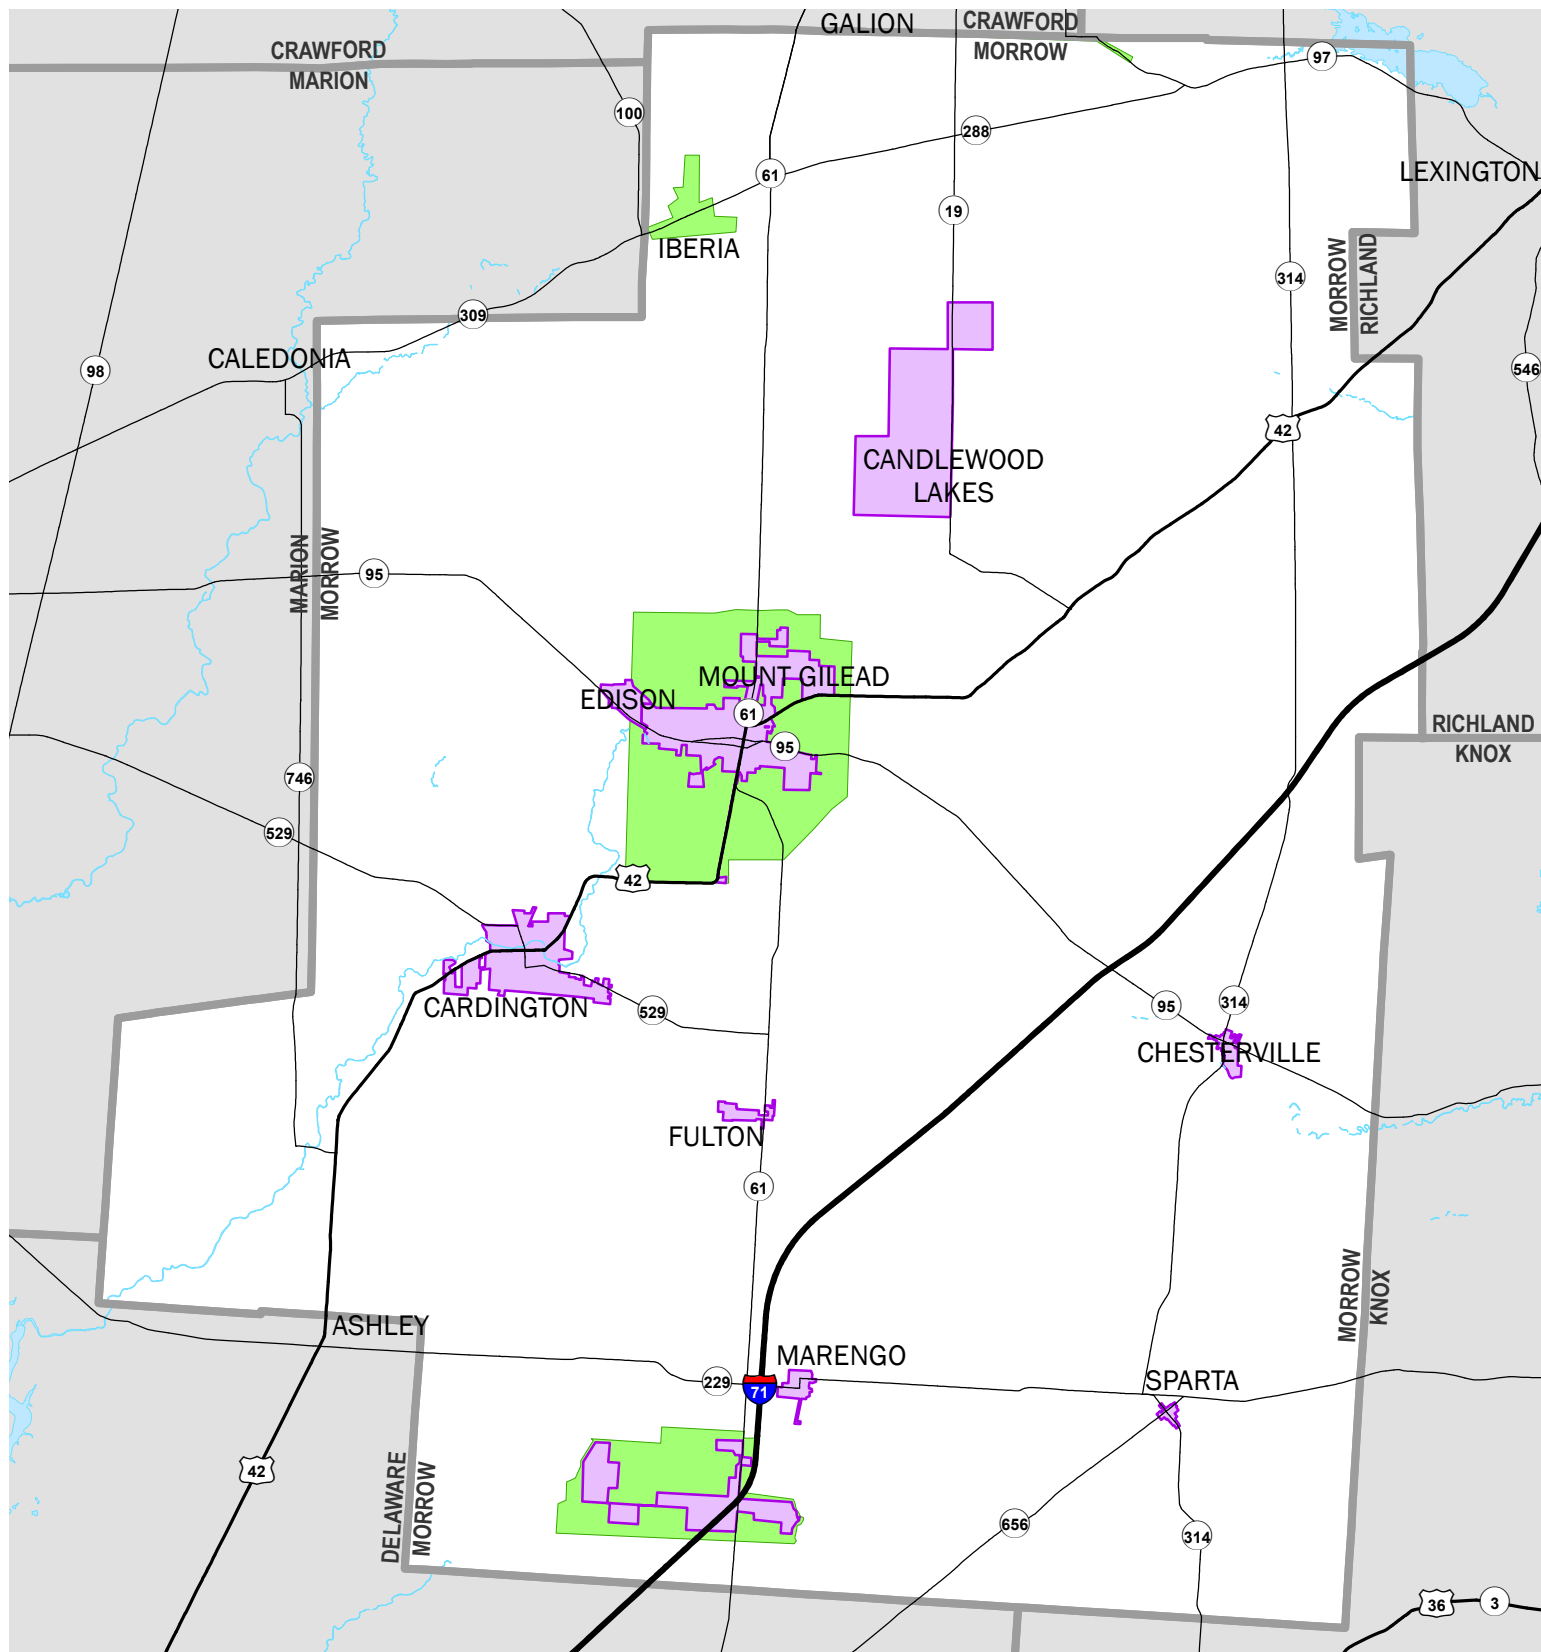

MORPC is Central Ohio's regional council for more than 70 members comprised of counties, cities, villages, townships, and regional organizations. We take pride in bringing communities of all sizes and interests together to collaborate on best practices and plan for the future of our growing region.
