

Technical Memo E - Project List

The CORPO 2023 – 2050 Transportation Plan (CTP) includes a list of all regional transportation project needs to the 2050 horizon. Many of these projects include, or may include, elements intended to improve the safety of the transportation system for all road users. The Safety Action Plan is intended to be used in conjunction with the long-range transportation plan and provide guidance for scoping, developing, and implementing the projects included in the long-range transportation plan. For more information on how the Safety Action Plan guides project identification and prioritization, see section 4.2 of the plan.

This appendix includes the list of projects included in the 2023 – 2050 CTP, sorted by project type.
